Summary

I am willing to engage in economic research as a job for a lifetime. This requires me to study further at a prestigious university as a doctoral student to qualify myself for it. Currently, my interests mainly lie in public economics and I am willing to explore it in both theoretical and empirical ways. To achieve the above goals, I am still actively acquiring the fundamental knowledge and skills. (This is a resume with a limit of two pages. You can check the detailed CV on my [personal website](https://junchengjiang1118.github.io))

Working Paper

- **Taxpayer Status and Monopoly Markup in Vertical Industrial Structure** (the preliminary)
 - * This is a theoretical topic that focuses on optimal VAT(value-added-tax) system design. (Have reported in conferences at Peking University, SUFE etc.)
 - * Ideally, value-added tax is neutral, but in reality, many small-scale companies do not have the qualifications to issue invoices, which can make VAT non neutral in this production network.
 - * The model is designed to address the issue of tax distortion between upstream and downstream enterprises in a vertical industrial structure, especially in monopolistic markets.
- **Follow the man you serve: Will the move up of your leader affect your political career?** (Proposal)
- **Personal Bankruptcy Law and Human Capital Insurance** (Proposal, with *Prof. Zhao Rong et.al*)
